Seller's description

Oum Dreyga witnessed 2003 Meteorite fall 19.3gr Individual

Name: Oum Dreyga

Observed fall: Yes
Year fell: 2003
Country: Western Sahara
Class and Type: L6 Chondrite
Mass: 17 kg

Specimen weight: 19.3 gr

Oum Dreyga
Gour Lefkah, Western Sahara
Fell 200316 October, 02:00 UT
Ordinary chondrite (H3-5)

On 16 October 2003, Moroccan soldiers stationed in Western Sahara saw a meteorite falling on Gour Lefkah Mountains, south of Zbayra, about 21 km from Oum Dreyga. The meteorite fell near a 670 km long wall built in 1985, protected by antipersonnel mines, and guarded by soldiers. About 17 kg were recovered. Stones from this fall were later brought to Moroccan dealers. Most of them have been collected after a rainfall and are thus slightly oxidized. However, some fragments have been picked up soon after the fall; these are very fresh. Fragments have been sold under the names Amgala and Gor Lefcah.

Classification and mineralogy (M. Bourot-Denise, MNHNP): very fresh, with a black fusion crust; H3-5 breccia (Fa 16.7 ± 6.0 ; 19.5 \pm 0.8; Fs 14.4 ± 4.4 ; 17.4 \pm 1.3), S4, W0. Specimens: type specimen 20 g and two polished mounts, MNHNP; one 1 kg complete stone and 30 fragments totalling 862 g with PThomas.

**This Meteorite specimen comes with an identification card
and will make an excellent addition to your collection**

Authenticity guaranteed!!!

**If you're not happy with this specimen we will gladly refund your purchase price, less shipping charges,
upon safe return of the item in original condition within 14 days**
