METEORITE HUNTER 1995
Gioldiexplorer - Meteorite dealer

This specimen is certainly a piece very rare rock worthy of belonging to any exigent collection of meteorites .
It is a unique opportunity to obtain this specimen quality very hard to see

only two pieces of these are found in the Campo del Cielo fall
Small magnetic rock It is composed of iron and graphite , gold and copper
Definitely a natural jewel of space...

one expecimen similar was recently found in Cañon del Diablo USA.

weight: 38.8 grams = 194 ct.

These rocks are from my personal collection , and I'm out of this activity since 2008. For this reason, put up for sale some of the latest irons that are in my possession.
the material is exclusive and of the highest quality.
few units, take the opportunity.

Since the product is in Uruguay South America,the shipping charges are listed below
