The confirmation number confirms that the package was delivered & when. USPS Delivery Confirmation numbers are NOT tracking numbers.

Item specifics

Outer Space:	millions of years ago
--------------	-----------------------

Seller's description

This is a complete, magnificent individual, weighing in at eight and one half (8 1/2#) pounds, _____ with a length of 8" x 7 1/2" wide x 4" thick, measurements all taken at the longest and widest areas. This individual has been here for awhile because the fusion crust is wearing off, but there is definitely enough remaining to prove positive that this individual is absolutely an alien from Outer Space. There is also, as you can see in the 6th photo posted, the thumbprints which actually show up better than I expected. I half expected the shot of the thumbprints to turn into some kind of off the wall or scary face as well, since all the other shots did.

There is something else quite unique about this meteorite, that may or maybe not also have something to do with the fact that this is a meteorite from Outer Space. I took 83 pictures of this individual & believe it or not, nearly every picture showed the face of another different

individual! There are more different faces on this, "individual" than anything I've ever seen before. I couldn't post anywhere close to even half of the faces the camera caught because, there is only room for 12 photos per listing. So, I posted only the very best of the best, or most interesting, or in reference to some of them, the most bizarre faces I've ever seen in my life! The thing is though, you can not see these faces when you look at the meteorite face to face, but the camera's eye certainly brings these faces to light. I'm serious! The winner of this meteorite is in for the surprise of their life the first time they decide to take a picture of this (or maybe I should say these) individual...s!

This meteorite was found last month, in an open field in Southern California. I posted a few photos of the field where I found this outstanding specimen along with a few other items that were also found in that field, but they are not for sale in this auction, only the black meteorite. The field has two (2) craters, though I only took a picture of one of them, impact glass, breccias, meteorites and beautiful rocks strewn all over the field.

Check out my other items! for some of the items shown from the field in the posted photos. Nothing grows in that field, hasn't for as long as I've known about the field as a meteorite field. It makes looking for meteorites and the like, a lot easier to find! Of course, a metal detector helps a lot as well, I love digging for buried treasures.

Even a strong magnet is an asset when your hunting meteorites, not to say that everything magnetic is a meteorite, or that every meteorite is magnetic, just that a strong magnet provides a good initial field test.

This awesome meteorite is not enhanced in any way, it was not photographed wet, no oils applied, and has not been heat treated.

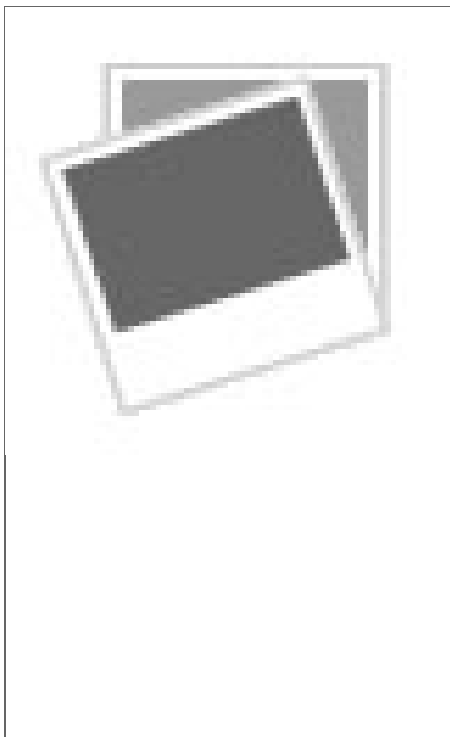

I guarantee you to be 100% satisfied with an item purchased from me, or I will refund in cash the total price paid, less shipping charges, if the item has been misrepresented in anyway, or gets damaged during shipping causing you to be dissatisfied upon it's delivery. Simply notify me within 48 hours of delivery for refund and return instructions.

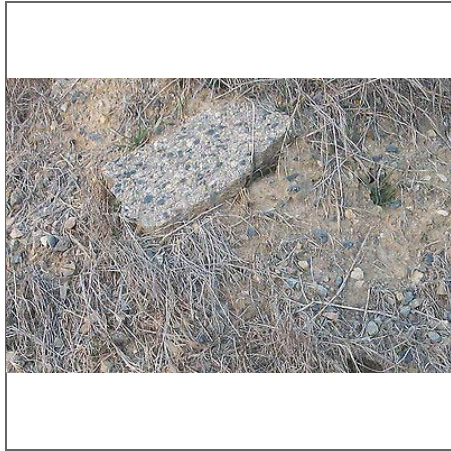

I am a member of The Meteorite Society, a fair and honest businessperson, and a sincere & upstanding human being with a reputation I am proud to stand by. You can feel confident & secure buying from me, it's risk free.

So relax, enjoy the auction, I've got you covered.
