### Item specifics

Classified: Pallasite /Chondrites

Type: Stoney Meteorites

Origin: City of Ross, TX vicinity

## 1 - Stony-Iron Pallasite & 4 small Meteorites From Ross, Texas vicinity

Get one larger stoney Pallasite meteorite at 17.3 grams and 4 additional smaller unclassified Chondrite meteorites found in nearby location! I walk for my health and while walking along roads with my meteorite-magnet-walking stick I sometimes spot and find meteorites. These specimens are from the vicinity of Ross, Texas where they may or may not be part of the larger meteorites that fell in Feb. 2009 that was to the north in the city of West, Texas. This larger collection piece is 33mm Long x 25mm Wide x 20mm Thick and has patina and super tiny olivine crystals trapped in the veins that are magnificent to observe under strong magnification. Add these meteorites to your collection and all of these meteorites are attracted to a rare earth magnet. The smaller meteorites appear to be 4 chondrites with some black indicating more recent fall where they are 10mm to 5mm in size and 2.3-.3grams - please see the enlarged photos. The **darker areas** on some reveal old crust with shiny areas of irregular formation shaping of regmaglypt hollow holes from super heat and explosion of entry into Earth's atmosphere. I've collected and sold many meteorites on eBay and experts and collectors alike have always found my descriptions of my items to be good - just see feedback - it says it all!

*Stony Pallasites are stony iron meteorites composed of olivine enclosed in minerals and metals. Iron meteorites are classified into thirteen major groups and consist primarily of iron-nickel alloys with minor amounts of carbon, sulfur, and phosphorus. The most common meteorites are chondrites, which are also stony meteorites. Radiometric dating of chondrites has placed them at the age of 4.55 billion years, which is the approximate age of the solar system. They are considered pristine samples of early solar system matter; although in many cases, their properties have been modified by thermal metamorphism or icy alteration.*

If you have any questions please don't hesitate to ask, and if you are not completely satisfied with my items simply return it within three days of receipt and I will refund your cost.
