Description

Rarest Australian Victorian Meteorite Found 1924 Bacchus Marsh Hollow Specimen

This has to be the rarest and most amazing item I have offered in over 7000 sales on ebay. A rare genuine Meteor Hollow Specimen found in Bacchus Marsh, Victoria in 1924.

There is an original museum display card that accompanys the piece with the hand written details.

This piece was acquired by me as part of a rock (mainly flints and aboriginal axes and grinding stones) that were collected in all parts of Victoria and Tasmania between 1916 and 1929. All the other samples have hand written locat of province and dates.

The hollow fragment is all original and I believe the reddish colour inside too is natural. I could be mistaken as to t though.

I will provide the winning bidder with details of the estate this was found to be part of.

A rare piece of meteorite.

Measures: 10 cm wide, 8.2 cm deep and 6.8 cm high.

Weight: 555 grams.

All auctions start at 99c without reserve and the market/buyers decide the final price. In fairness all bidders we don't do 'Buy It Nows' - so please don't ask!

STRICTLY NO PICK UPS AVAILABLE POSTAGE ONLY-
